**MOLECOR, AWARDED AS THE BEST SME OF THE YEAR
IN THE SECOND EDITION OF THE CEPYME AWARDS**

Molecor Tecnologia S.L., a Spanish company specialized in manufacturing and developing the latest technology for PVC Oriented pipes (PVC-O) for the conveyance of water under pressure, has been awarded as the best "**Small and Medium Enterprise of the Year**" in the **Second Edition of the CEPYME Awards** that convenes the Spanish Confederation of Small and Medium Enterprises and the Spanish Federation of Autonomous (CEAT). In that category, business excellence, considering entrepreneurship, innovation, internationalization and employment creation, is highlighted.

For the company, this award represents recognition of great work and a great encouragement to continue investing in the quality of the sector.

"Thinking different was not to think like a SME, that's what we were, but to think in terms of a multinational", have highlighted the founders of Molecor®.

The aim of these awards is to recognize and disseminate the work of small and medium enterprises as well as of self-employers, highlighting the performance of their work at the service of society both in Spain and abroad, and the protagonist role they play becoming the motor and pulse of the economy.

The awards have had the honorary presidency of His Majesty the King, and have been sponsored by Banco Santander in collaboration, among others, with Facebook and Randstand.

Molecor Tecnologia S.L., with only eight years of trajectory, is positioned in the global water market as the leader in technology and manufacture of PVC-O for the conveyance of water under pressure.

The activity of the company is developed in two lines of business, Molecor® Canalizaciones, TOM® PVC-Oriented pipes productive center, and Molecor® Tech, R & D center dedicated to

the development and sale of machinery and technology, both production centers located in the Community of Madrid.

There are two features that make Molecor® different from other companies of the sector, not only in Spain but in the world: its continued commitment to research and development, and its global business vocation, setting a worldwide target market.

Among its main values highlight the commitment to human capital, equal opportunities, commitment to technological development, transparency, loyalty, trust and commitment to environmental protection.

Molecor® is a leader company specialized in the development of the latest technology applying molecular orientation to pipeline solutions with astonishing mechanical properties. Founded in 2006 by highly skilled engineers in this field, with a proven experience in the plastic pipe division, this revolutionary developed process provides reliable and user friendly systems that widen the pipe global business possibilities. Molecor® activity is developed in two divisions, **Molecor® Tech** and **Molecor® Canalizaciones**, with an effective connection which results in mutual benefits.
